VOLUME CONTENTS

Number 1

M.E. Erdogan	1	A note on an unsteady flow of a viscous fluid due to an oscillating plane wall
V.B. Glavardonov and T.M. Atanackovic	7	Stability of a pipe through which a string is pulled
L. Xiaobing, Z. Jiahua and Y. Zhengsheng	21	The evolution of shear bands of saturated soil
A. El-Gohary	27	On the control of programmed motion of a rigid body containing moving masses
J.-H. He	37	A coupling method of a homotopy technique and a perturbation technique for non-linear problems
A. Ossowski	45	Quadratic stability of dynamical systems with perturbations
S. Natsiavas, S. Theodossiades and I. Goudas	53	Dynamic analysis of piecewise linear oscillators with time periodic coefficients
G.-K. Er	69	Exponential closure method for some randomly excited non-linear systems
D.D. Quinn, C.B. Clemons and K.M. Dempsey	79	On the $\mathscr{SO}(2)$ symmetric deformation of rotating rings with shear deformation
Yu A. Andrienko, D.A. Siginer and Yu G. Yanovsky	95	Resonance behavior of viscoelastic fluids in Poiseuille flow and application to flow enhancement
D.Y. Gao	103	Finite deformation beam models and triality theory in dynamical post-buckling analysis
F. Ghorbel and M.W. Spong	133	Integral manifolds of singularly perturbed systems with application to rigid-link flexible-joint multibody systems
H. Reismann	157	Three-dimensional finite inextensional deformation of a beam
A.M. Vinogradov and W.R. Derrick	167	Structure-material relations in the buckling problem of asymmetric composite columns

Number 2

Seong Beom Lee and Alan Wineman	177	A model for non-linear viscoelastic coupled mode response of an elastomeric bushing
M. Zidi	201	Azimuthal shearing and torsion of a compressible hyperelastic and prestressed tube
M.A. Dowaikh	211	Surface waves propagating in a half-space of neo-Hookean elastic material subject to pure homogeneous strain
J.S. Jensen	217	Buckling of an elastic beam with added high-frequency excitation
F.X. Mei	229	On the integration methods of non-holonomic dynamics
A. Maccari	239	Modulated motion and infinite-period homoclinic bifurcation for parametrically excited Liénard systems
P. Ribeiro and M. Petyt	263	Non-linear free vibration of isotropic plates with internal resonance
Anwen Wang	279	Axisymmetric postbuckling and secondary bifurcation buckling of circular plates
P.C. Tse and C.T. Lung	293	Large deflections of elastic composite circular springs under uniaxial tension
Gamal M. Mahmoud and S.A. Aly	309	Periodic attractors of complex damped non-linear systems
R.L. Huston	325	Use of elliptic functions to study skip-lock of automobile seat-belt retractors
S.S. Simic	333	Cubic invariants of one-dimensional Lagrangian systems
Hilmi Demiray	347	A method for higher-order expansion in non-linear ion-acoustic waves
Lu Xiaobing, Yang Zhengsheng and Zhang Jiahua	355	The instability analysis of saturated soil under shear load
X. Jiang and R.W. Ogden	361	Some new solutions for the axial shear of a circular cylindrical tube of compressible elastic material

Number 3

F. Zhu and C.D. Rahn	373	Limit cycle prediction for ballooning strings
H.H. Denman	385	Approximate invariants and Lagrangians for some autonomous, non-linear dissipative systems. III. Time dependence
A. El-Gohary	393	Optimal stabilization of the rotational motion of a rigid body with the help of rotors
N. Kim and L. Debnath	405	Motion of a buoy on weakly viscous capillary gravity waves
C.-S. Liu	421	A Jordan algebra and dynamic system with associator as vector field
J. Peng and Y. Liu	431	Chaotic motion of a gyrostat with asymmetric rotor
M.E. Fares	439	Generalized non-linear thermoelasticity for composite laminated structures using a mixed variational approach
H.-K. Hong and C.-S. Liu	447	Internal symmetry in the constitutive model of perfect elastoplasticity
M. Ganapathi, B.P. Patel, P. Boisse and M. Touratier	467	Non-linear dynamic stability characteristics of elastic plates subjected to periodic in-plane load
J.B. Haddow	481	Inflation and deflation of a pseudo-elastic spherical shell
S.P. Sosnitskii	487	On the instability of equilibrium of gyroscopic coupled conservative systems
G.M. Chechin, V.P. Sakhnenko, H.T. Stokes, A.D. Smith and D.M. Hatch	497	Non-linear normal modes for systems with discrete symmetry
C.A. Featherston	515	The use of finite element analysis in the examination of instability in flat plates and curved panels under compression and shear
I.G. Raftoyiannis and A.N. Kounadis	531	Dynamic buckling of 2-DOF systems with mode interaction under step loading
A.M. Karlsson and W.J. Bottega	543	On the behavior of a class of patched plates during cooling

Number 4

C.G. Speziale	567	On Maxwell models in viscoelasticity that are more computable
L. Cavaleri and M. Di Paola	573	Statistic moments of the total energy of potential systems and application to equivalent non-linearization
F. Gonzalez Gascon and D. Peralta Salas	589	Symmetries and first integrals of divergence-free $\mathbb{R}^3$ vector fields
G. Akgün and H. Demiray	597	Modulation of non-linear axial and transverse waves in a fluid-filled thin elastic tube
L.Y. Bahar	613	A unified approach to non-holonomic dynamics
J.M. Manale	627	Group classification of the two-dimensional Navier–Stokes-type equations
Z.L. Huang and W.Q. Zhu	645	Lyapunov exponent and almost sure asymptotic stability of quasi-linear gyroscopic systems
D.C. Polidori, J.L. Beck and C. Papadimitriou	657	A new stationary PDF approximation for non-linear oscillators
P. Metallidis and S. Natsiavas	675	Vibration of a continuous system with clearance and motion constraints
M. Emin Erdoğan	691	Unsteady flow between two eccentric rotating disks executing non-torsional oscillations
E.G. Ladopoulos	701	Non-linear multidimensional singular integral equations in two-dimensional fluid mechanics
H.-J. Ko and G.S. Dulikravich	709	A fully non-linear theory of electro-magneto-hydrodynamics
Ülo Lepik	721	On dynamic buckling of elastic–plastic beams
Baisheng Wu and Huixiang Zhong	735	Efficient computation for lower bound dynamic buckling loads of imperfect systems under impact loading
M. Massoudi and T.X. Phuoc	745	The effect of slip boundary condition on the flow of granular materials: a continuum approach

Number 5

M.M. Oshhunov and S. Ozden	763	The general stress and strain relationship in non-linear materials
J.-S. Lin and C.-C. Hwang	769	Finite amplitude long-wave instability of power-law liquid films
S. Chakravarty and P.K. Mandal	779	Two-dimensional blood flow through tapered arteries under stenotic conditions
M. Panet and L. Jezequel	795	Dissipative unimodal structural damping identification
L.D. Lutes and C. Papadimitriou	817	Direct derivation of response moment and cumulant equations for non-linear stochastic problems
Z.G. Ying and W.Q. Zhu	837	Exact stationary solutions of stochastically excited and dissipated gyroscopic systems
K.J. Sandiford and G.A. Rogerson	849	Some dynamic properties of a pre-stressed, nearly incompressible (rubber-like) elastic layer
P.A. Gremaud, D.G. Schaeffer and M. Shearer	869	Numerical determination of flow corrective inserts for granular materials in conical hoppers
Y.H. Lin and M. Hua	883	Influence of strain hardening on continuous plate roll-bending process
A.D. Drozdov	897	A model of cooperative relaxation in finite viscoelasticity of amorphous polymers
N.C. Huang and P.D. Pattillo	911	Helical buckling of a tube in an inclined wellbore
F. Conforto	925	Wave features and group analysis for an axi-symmetric model of a dusty gas
C.-S. Liu	931	Intermittent transition to quasiperiodicity demonstrated via a circular differential equation
M. Crâşmăreanu	947	A Noetherian symmetry for 2D spinning particle

Number 6

B. Wikieł and J.M. Hill	953	Stick–slip motion for two coupled masses with side friction
P.M. Mariano and L. Sabatini	963	Homothermal acceleration waves in multifield theories of continua

A. El-Gohary	979	The optimal control of an angular motion of a gyrostat containing fluid
A. El-Gohary	987	The control of a permanent rotational motion and equilibrium position of a spacecraft
C.P. Filipich and M.B. Rosales	997	A further study on the postbuckling of extensible elastic rods
C. Balan and R. Fosdick	1023	A rheological model for materials which support coexistent shear rates
M. Massoudi and G. Johnson	1045	On the flow of a fluid–particle mixture between two rotating cylinders, using the theory of interacting continua
Y.-H. Zhou, Y. Gao, X. Zheng and Q. Jiang	1059	Buckling and post-buckling of a ferromagnetic beam-plate induced by magnetoelastic interactions
P.R. Everall and G.W. Hunt	1067	Mode jumping in the buckling of struts and plates: a comparative study
A. Passerini and M.C. Patria	1081	Existence, uniqueness and stability of steady flows of second and third grade fluids in an unbounded "pipe-like" domain
V.O. Vakhnenko, V.A. Danylenko and A.V. Michtchenko	1105	Diagnostics of the medium structure by long wave of finite amplitude
M. Zidi	1115	Finite torsion and shearing of a compressible and anisotropic tube
